

# Long-Term Care Hospital (LTCH) Quality Reporting Program (QRP) Public Reporting Archives

June 18, 2020

## LTCH Provider Preview Reports – Now Available

Long-Term Care Hospital (LTCH) Provider Preview Reports have been updated and are now available. The data contained within the Preview Reports is based on quality data submitted by LTCHs between **Quarter 1 – 2019 and Quarter 4 – 2019** and reflects what will be published on LTCH Compare during the **September 2020** refresh of the website. Providers have until **July 18, 2020** to review their performance data. Corrections to the underlying data will not be permitted during this time; however, providers can request CMS review of their data during the preview period if they believe the quality measure scores that are displayed within their Preview Reports are inaccurate.

Beginning with the September 2020 refresh, CMS will publicly display on the LTCH Compare website three new measures: *Changes in Skin Integrity Post-Acute Care: Pressure Ulcer/Injury*; *Drug Regimen Review Conducted with Follow-Up for Identified Issues – PAC LTCH QRP*; *Functional Outcome Measure: Change in Mobility Among Long-Term Care Hospital Patients Requiring Ventilator Support*. LTCH performance data for these measures will be included for the first time on this preview report. We will additionally be removing one quality measure from the LTCH Compare site for the September 2020 refresh: *Percent of Residents or Patients with Pressure Ulcers that are New or Worsened*.

For more information, please visit the [LTCH Compare website](#).
