LTCH QRP Measure Calculations and Reporting User's Manual V3.1.2

The Long-Term Care Hospital (LTCH) Quality Reporting Program (QRP) Measure Calculations and Reporting User's Manual Version 3.1.2 addendum and associated risk adjustment appendix are now available in the **Downloads** section below.

The manual serves as an addendum that communicates quality measure updates to the LTCH QRP Measure Calculations and Reporting User's Manual Version 3.1 and replaces the LTCH QRP Measure Calculations and Reporting User's Manual Version 3.1.1. The LTCH QRP Measure Calculations and Reporting User's Manual V3.1.2 is effective on October 1, 2020 and provides information on measure-related changes in a change table format in lieu of a complete update to the overall manual. Additionally, the updated Risk Adjustment Appendix file for the LTCH QRP Measure Calculations and Reporting User's Manual V3.1.2 is included and replaces the Risk Adjustment Appendix file for the LTCH QRP Measure Calculations and Reporting User's Manual V3.1.1.

Additional updates to the quality measure specifications in the manual V3.1.2, which are not included in the manual V3.1.1, are corrections to the LTCH Ventilator Liberation Rate (VLR) measure's calculation formulae. The predicted score formula and expected score formula were corrected, and existing formulae and variable definitions originally defined in the LTCH QRP Measure Calculations and Reporting User's Manual V3.1 were revised to

reflect the corrected formulae. The only changes to the Risk Adjustment Appendix for manual V3.1.2 are updated language referencing the VLR measure and the LTCH QRP Measure Calculations and Reporting User's Manual V3.1.2 addendum. No coefficient values were changed between the Risk Adjustment Appendices for manual V3.1.2 and manual V3.1.1.
