

# ACHIEVING QUALITY COVID-19 TESTING IN SCHOOLS

The Centers for Medicare & Medicaid Services (CMS) wants to ensure that your student has access to accurate COVID-19 testing.

CMS has simplified the process for schools to provide COVID-19 testing. Your students will now be able to get tested at their school.

Your school must be certified by CMS for COVID-19 testing. Certification is important because it helps ensure that your school provides accurate and reliable testing. Download and complete the [CLIA application](#).

Each state has a process in place to ensure schools can quickly obtain CLIA certification.

Providing ease of access for COVID-19 testing helps us get one step closer to safely reopening schools.
